Our Success Stories

es (tierate, key) (

described for locale '\${locale}'';

Food Factory

Food Factory is an expansive ERP system meticulously designed to automate and enhance the operations of both the corporate and manufacturing divisions within the organization. From HR management to the production line, the system is specifically built to streamline processes and improve efficiency.

With remarkable success, Food Factory has revolutionized the way operations are conducted, replacing sluggish and perplexing paper-based procedures with swift and digitized systems. The implementation of this tailor-made solution has measurably enhanced the efficiency and traceability of operations, providing a user-friendly interface that is easy to navigate and quick to learn.

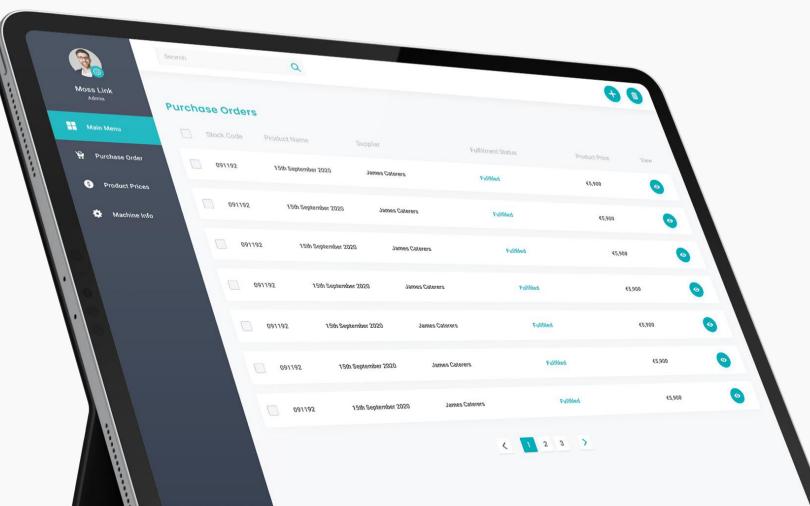

Polidano Properties

Polidano, the premier construction and asset management company in Malta, entrusted us with the task of fully digitizing their asset management and business processes, while simultaneously delivering a distinctive and enduring experience for key stakeholders.

Our objective was to help Polidano eliminate paper-based filing systems and transition towards a robust, cloud-based application. This transformative solution provides comprehensive insights into every intricate detail, eliminating the need for extensive research and involving multiple stakeholders to retrieve crucial information.

ventura

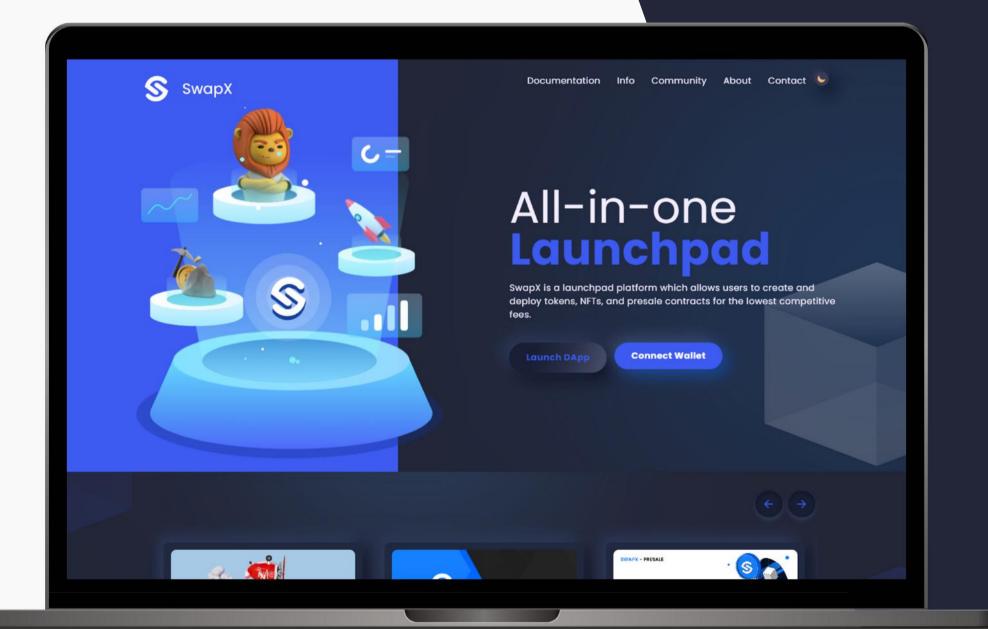

Ventura, Malta's leading appliance vendor, partnered closely with Avant to develop a cutting-edge product management and ordering platform. The primary aim was to streamline the ordering process and seamlessly integrate all stakeholders.

Thanks to Avant's customized technology,
Ventura effectively saves up to 1000 hours
per year, whilst having transitioned from
traditional paper pricing to a modern cloud
platform. This seamless integration brings
together buyers, wholesalers, sales agents,
and company staff, simplifying operations
and enhancing collaboration for all parties
involved.

S

SwapX

We built a platform that allows users to design, create, deploy and buy/sell coins, and even run IPO style presale events.

S

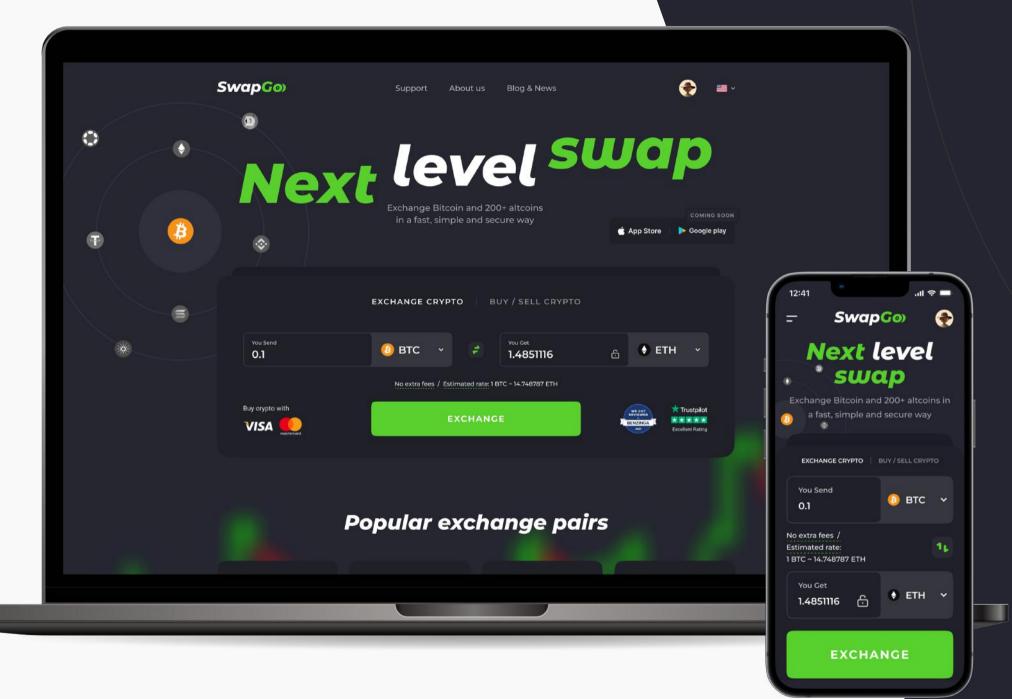

Through a complex network of smart contracts and automation software we helped project owners build, deploy and manage their coins and tokens safely as well as market them.

Investors and buyers could then use the website to either purchase directly or take part in presales.

Security here was a top concern and due to that, we established a perfect safety record.

Swap Go)

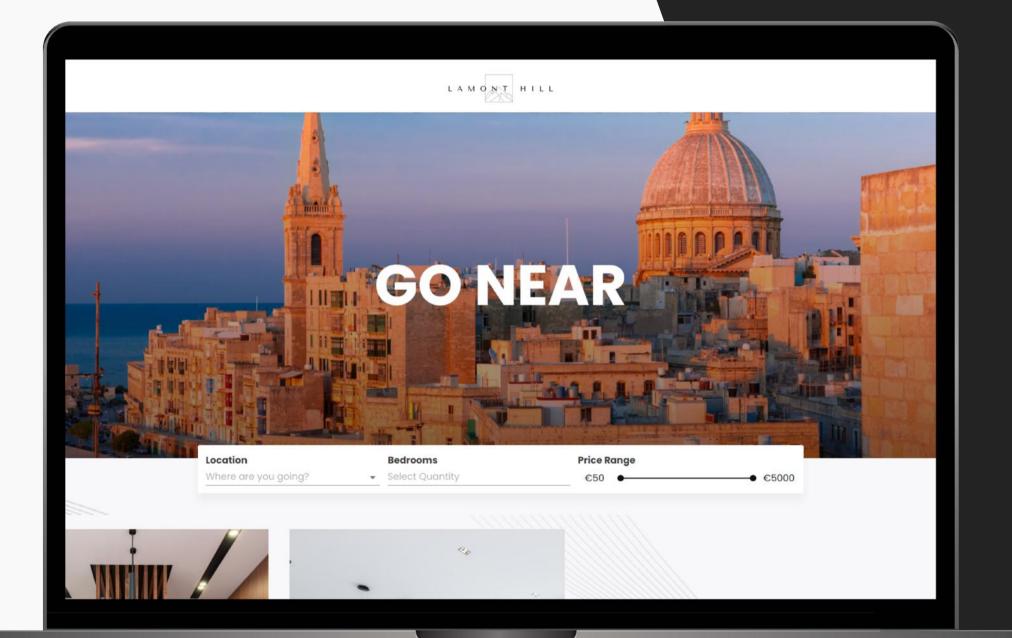

SwapGo simplifies the process of buying and selling cryptocurrency by seamlessly integrating with various third-party APIs. By creating a platform that enables secure interactions among these APIs, we have eliminated the complexities associated with crypto transactions.

Our innovative solution empowers users to trade using their preferred payment methods and at their convenience, removing the need to wait for perplexing crypto confirmations or experience delays in transactions. With SwapGo, crypto trading becomes hassle-free and efficient.

LAMONTHILL

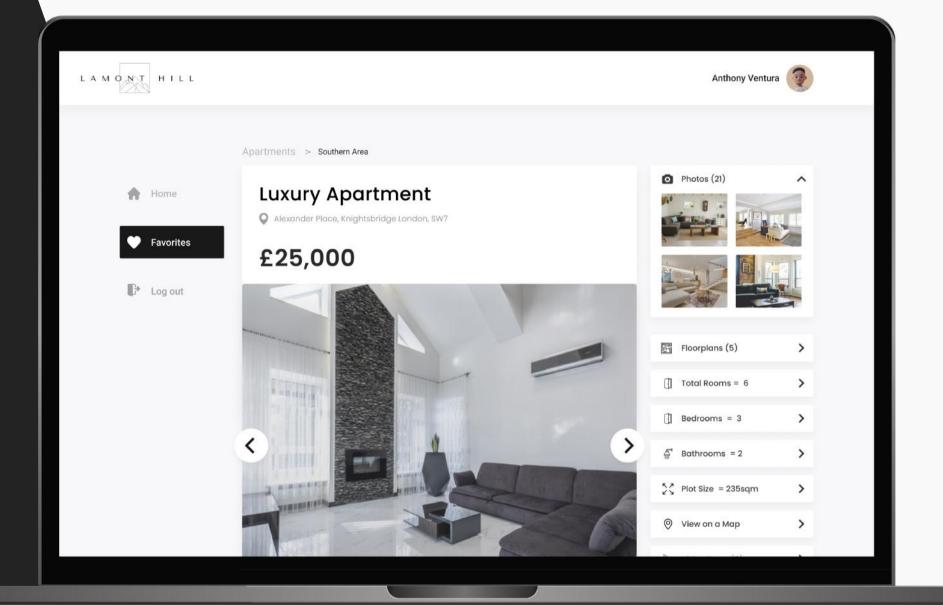

LAMONT HILL

Our primary objective was to design a comprehensive management dashboard for our client's real estate portfolio.

However, we went above and beyond by crafting a bespoke real estate marketplace that eliminated the requirement for external agencies.

Our platform offers a white label solution that can be customized and adapted to suit the unique requirements of future clients.

It encompasses a comprehensive management dashboard for property portfolios, seamless integration with client websites for optional listings, and a user-friendly financial overview for effortless management.
